LABELS FOR THERMAL TRANSFER PRINTING

THERMOTEX offers textile labels for every need: from small retirement homes, public institutions or clinics, as well as for large laundries, garment producers and textile manufacturers. The labels are produced in your desired format: as continuous rolls, pre-cut, self-adhesive, coloured, printed or unprinted – both for sewing on or for patching. The decisive factor is the exact coordination of the printer on the marking and coloured tapes. This is the only way to achieve a high quality and washable print image.

THERMOTEX. The Next Generation.

COMPUTER TAPE

CT 2066

The computer tape is suitable for printing name, clean room and care labels in work clothes, and for printing barcodes using thermal transfer printers.

- sew-on
- double-sided printing possible
- highly wash-resistant
- quality: CT 2066
- tested for harmful substances pursuant to Oeko-Tex Standard 100

COMPUTER MARKING TAPE

CK 2006-N-D

The computer marking tape is perfect for the production of wash and dry-cleaning resistant labels.

- sew-on
- highly wash-resistant

READY-MADE
CARE LABELS
ON REQUEST!

LABELS THERMAL TRANSFER PRINTING SYSTEMS

MARKING TAPES AND INK RIBBONS FOR THE CLOTHING AND MANUFACTURING INDUSTRY

The perfect printing result, the highest degree of wash-resistance and resistance to abrasion – this is what the marking tapes and ink ribbons offer in combination with the appropriate printing system. The clothing manufacturing sector in particular places great demands on the labels used.

On request, we can also supply pre-printed care labels ready for sewing in!

POLYESTER SATIN TAPE (PS)

AVAILABLE IN VARIOUS QUALITIES AND COLOURS

SOFT QUALITY

Polyester satin tapes are perfect for the production of wash-resistant care labels for sewing in. They are available in various qualities and colours.

- ☐ soft quality
- ☐ tested for harmful substances pursuant to Oeko-Tex Standard 100

NYLON TAFFETA TAPE (NT)

AVAILABLE IN VARIOUS QUALITIES

Nylon taffeta tape is also suitable for the production of wash-resistant care labels for sewing in.

- ☐ thin, smooth surface
- ☐ NT01 + NT41P: tested for harmful substances pursuant to Oeko-Tex Standard 100

POLYESTER TAFFETA TAPE (PT)

WASH-RESISTANT, FOR SEWING IN

HIGH WEARING COMFORT

Polyester taffeta tapes are also perfect for the production of wash-resistant care labels for sewing in.

- ☐ tapes for double-sided printing
- ☐ robust, smooth surface
- ☐ PT01 + PT09: tested for harmful substances pursuant to Oeko-Tex Standard 100

LABELS FOR DOT- MATRIX PRINTING

THERMOTEX offer a comprehensive range of marking tapes, labels and ribbons for the most diverse requirements. Whether you're looking for an efficient solution for smaller projects in care homes, public facilities and clinics or require a professional system for laundries or manufacture – we can provide you with a solution tailored to your requirements. Our extensive portfolio has the perfect product for every occasion.

THERMOTEX. The Next Generation.

LABEL PROPERTIES

DOT MATRIX PRINTING VS. THERMAL TRANSFER PRINTING

Both methods have their advantages.
We help you to make your decision:

Advantages of dot matrix printing:

- ☐ very exact feed accuracy
- ☐ robust technology

Advantages of thermal transfer printing:

- ☐ low printing costs
- ☐ razor-sharp print image
- ☐ high contrast
- ☐ colour printing possible
- ☐ faster printing
- ☐ high durability
- ☐ low maintenance technology
- ☐ wide range of supplies

FURTHER SUPPLIES

Textiles are extremely multifaceted: baby clothing, tarpaulins and awnings, fire blankets, clinical dressings, carpets and floor coverings, ship ropes, car seats, bed linen, etc. Due to this variety, the individual goals and requirements of the textile finishing are very different. In order to meet your needs, you will find a selection of other available supplies here.

THERMOTEX. The Next Generation.

LABEL PROPERTIES

FOR YOUR TEXTILE FINISHING

Protect your resources by repairing holes or cracks in textiles – with our patch and repair materials. Would you like to make your own patch and repair materials? In this case, we offer you our coating materials. If you would also like to protect your barcodes, you will receive sealing materials from us. In addition, you will find that our product range also includes reflective material on rolls, as well as name tags for every use!

| Quality | Wash resistance | Properties | Delivery |
|-----------------------|---------------------------|---|---|
| Heat seal materials | industrial wash resistant | light / medium quality: strong, versatile heavy quality: high fabric density, sturdy, for heavy clothing |   |
| Coating foil | industrial wash resistant | for in-house manufacture of patch / repair material |  |
| Woven labels | industrial wash resistant | very robust |   |
| Sealing labels | industrial wash resistant | razor-thin, transparent labels, for dot matrix printed labels, for even better wash resistance |  |
| Reflective material | industrial wash resistant | for reflective safety strips on PPE clothing. Reflection values according to DIN EN ISO 20471 |  |
| Transfers | industrial wash resistant | suitable for industrial ironing , individual |   |
| Fixtransfer | industrial wash resistant | lint-free, clean-room suitable |   |
| Sublimation transfers | industrial wash resistant | clean-room suitable, individual |  |

COATING FOIL (BF, BT)

COATTEXTILES IN-HOUSE

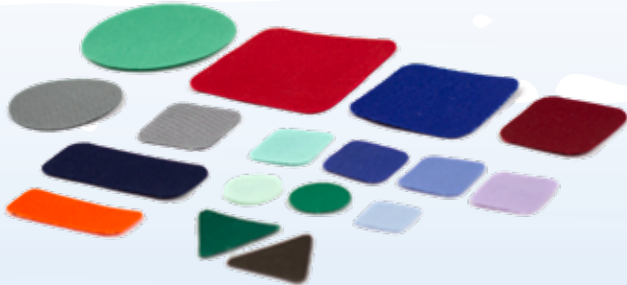

The areas of application for textile coating are very diverse and comprehensive. In order that you also have the suitable coating foil, we offer two different versions: with and without backing paper. In this way, you can simply produce your own patch and repair materials!

Transfer the coating foil on to the textile of your choice. Then cut the desired patch size. The coated textile is then permanently attached to the end product by means of pressure and heat using a heat-sealing machine.

- ☐ BT = coating film on backing paper
- ☐ BF = coating film without backing paper
- ☐ standard sizes: width 100 mm / length 50 m (roll)
- ☐ narrower widths on request

HEAT SEAL MATERIALS (PA)

PLEASE SEE THE FOLLOWING PAGE FOR AN OVERVIEW OF FORMATS, CUSTOM FORMATS ON REQUEST

Save on costs by repairing your own textiles and clothing!

With our patch materials you can mend holes, rips or other forms of damage to your valuable textiles and clothing quickly, cheaply and permanently. A damage area can be repaired both from the front as well as the back, hence hiding the patch inconspicuously.

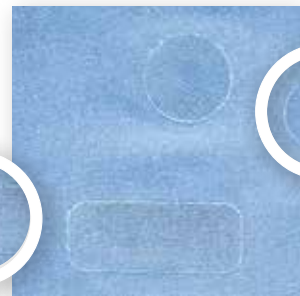

- ☐ for fast and easy laundry repairs
- ☐ available in various qualities and colours

| | light / medium quality | heavy quality | low temperature |
|---------------------------------|--|-------------------------|-------------------------|

FURTHER SUPPLIES

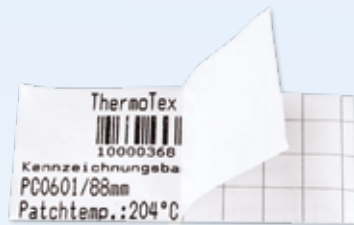

WOVEN LABELS

Our woven labels are extremely robust and are available in various qualities, e.g. in polyester, taffeta, satin, etc.

- ☐ for sewing on or heat sealing
- ☐ single cut or on a roll
- ☐ different formats depending on the application

SEALING LABELS (VL)

Sealing labels are designed to protect labels and the text printed on them, e.g. a barcode. The label is heat sealed on together with the text label in one work-step.

- ☐ are supplied individually cut
- ☐ minimum order volume: 1,000 pieces

Note: The backing paper is removed while warm after the heat sealing process.

REFLECTIVE MATERIAL ON ROLLS

Reflective material is used particularly in the clothes manufacturing industry because of its high reflective values. It is available for heat sealing or for sewing on.

- ☐ complies with DIN EN ISO 20471
- ☐ standard width: 50mm
- ☐ other widths on request
- ☐ roll length: 50m

The reflective materials meet the following standards*:

DIN EN ISO 11611
Welding protection

DIN EN 1149-T1-5
Electrostatic properties

DIN EN ISO 11612
Heat and flame retardancy

DIN EN 13034
Protective clothing against liquid chemicals

DIN EN ISO 14116
Protection against heat and flame, protection against flame

DIN EN 343
Weather-protective clothing

DIN EN ISO 20471
PSA high visibility safety norm

DIN EN 510
Specification for protective clothing for use where there is a risk of entanglement with moving parts

DIN IEC 61482-1-2
Protective clothing against the thermal hazards of an electric arc

DIN EN 61340-5-1
Clothing for protection of electronic devices

*100% compliance is textile-dependent

TRANSFERS

TRANSFERS (T)

Our transfers are ideal for the fast labelling of flat textiles (bed linen, serviettes, towels, etc.). They are manufactured on transfer paper and be supplied either individually cut or on a roll.

- ☐ for high volumes for speedy property identification
- ☐ motifs with one to four colours possible
- ☐ short heat sealing time (3-5 seconds) at 204°C
- ☐ ideal for flat textile
- ☐ wash-resistant up to 95°C
- ☐ **suitable for mangle: yes**
- ☐ minimum order volume: 500 pieces per motif

FIXTRANSFERS (FI)

Fixtransfers have a transparent coating and are ideal for the labelling of light-coloured work clothes, undergarments and outer clothing. Since they are completely lint-free, they can be used even in cleanroom conditions.

- ☐ fast and easy application
- ☐ pleasant to wear
- ☐ transparent film, printed in one colour
- ☐ available colours: black, red, green, blue
- ☐ suitable for mangle: no

SUBLIMATION TRANSFERS (SU)

Sublimation transfers are perfect for cleanroom clothing and for polyester textiles in general. The sublimation ink sinks completely into the fabric. All colours are possible with this process.

- ☐ only for use on light-coloured 100% polyester fabrics
- ☐ custom design possible

LABELS ON ROLLS, PRE-PRINTED (E)

Labels on rolls are printed on backing paper in a screen printing process. They are suitable for general property identification, e.g. ideal for towelling fabrics.

- ☐ they are suitable for general property identification, e.g. ideal for towelling textiles
- ☐ labels printed used a screen printing process
- ☐ customer design possible – your choice of logos and text
- ☐ various qualities (see color card)
- ☐ various widths from 10 mm to 50 mm
- ☐ supplied on rolls

NAME BADGES

OFFICE – THE PRACTICAL NAME BADGE FOR DAILY USE

- ❑ name card protected behind a window of anti-reflective plastic
- ❑ with power magnets* (standard: high magnetic strength; optionally with extreme magnetic strength)
- ❑ optional hanging clip or combi clip comprising a safety pin and clip
- ❑ replacement parts available separately
- ❑ frames available in many colours
- ❑ easy exchange of badge when changing clothes
- ❑ tried and tested design with rounded corners – no catching, no injuries, e.g. when dealing with patients
- ❑ 2 proven, practical standard formats:
 - office 30** (81 x 33mm) for 75 x 27 mm name cards
 - office 40** (81 x 43mm) for 75 x 37 mm name cards

* not suitable for wearers with pacemakers!

PROFIL – ELEGANT NAME BADGE MADE OF HIGH-QUALITY ACRYLIC GLASS

Areas of application: training sessions, professional development courses, conferences, congresses, seminars, events, service sector, services, doctors' practices, hospitals, clinics, gastronomy, canteens, pharmacies, etc.

- ❑ optimal legibility thanks to highly transparent acrylic glass
- ❑ curved profile holds name card firmly in place
- ❑ with fastening pin, universal fastening (clip / combi clip) or power magnet* (standard: high magnetic strength; optionally with extreme magnetic strength)
- ❑ replacement parts available separately
- ❑ 3 proven, practical standard formats:
 - profil 20** (60 x 20mm / 75 x 20mm) for 75 x 17 mm name cards
 - profil 30** (60 x 30mm / 75 x 30mm) for 75 x 27 mm name cards
 - profil 40** (60 x 40mm / 75 x 40mm) for 75 x 37 mm name cards

* not suitable for wearers with pacemakers!

Applies for both variants: text

- ❑ by hand (tip: pre-print name cards with logo if possible)
- ❑ using standard PC programs (word-processing, etc.)
- ❑ with the special badge designer software on pre-perforated A4 printing sheets; suitable for laser or inkjet printers
- ❑ printed sheets, also with logo, on request
